Subject: Transition Issue Papers **Please Review before LT - Due Date for papers is Friday 10/2**

LT –
As I mentioned a month or more ago, the region is setting up an administration transition team in case there is a change after the election. Laura Jenkins is the lead to put together the transition materials.

There is a requirement to put together a national transition book (the WD does not have anything for this book), and our regional book. Laura asked the SLT to look at the previous transition papers and remove those that are no longer relevant and add any new ones. We identified the following items:

WD	Denver Water - Lead in Drinking Water	Active
WD	Upper Missouri Waterkeeper Litigation	Active
WD	Lake Koocanusa/Kootenai Transboundary Water Quality	Active
WD	Dewey Burdock UIC Permitting	Active
WD	PFAS Activities in Region 8	Active
WD	Reducing Nutrient Pollution in R8 Waters	Active
WD	Afton Drinking Water	Active
WD	Boysen Reservoir Watershed Permitting Development	Active

Laura has asked that we update these issue papers by COB on 10/2 (this Friday). If this timing will be difficult for the SMEs for each of these, let me know what may be a more appropriate time frame and I will discuss with Laura. I suggest we NOT do a paper for Afton yet – let's see how far we get over the next month with the town.

I'm including the template Laura is asking us to use, and several of these would build off what was done previously, so hopefully the lift will not be large. Since the audience, if there is one, will not be looking at these until sometime after the election – please design these with that in mind to minimize the need for updates. For example, the Dewey permits will be issued prior to the election, so this should be focused on the action we took, those concerned with the action, expected challenges and any next steps.

Let me know if you have questions on this in LT tomorrow. Also, if you have other items that you think we should include, let me know Tuesday. We can add things later as well.

Thanks!
D
